Copy any of the HTML codes and paste them into your eBay description box. Then just add your descriptions. If you want to use this stuff to create a webpage Click here.

How to copy & paste.  

What is a URL?

NOTE
- Size and color can be changed to meet your needs.
- Everything must be pasted into the description box.
- If you want the "camera icon" with your listing, you should add a small picture in the "Picture URL" box. (NOTE) This is not needed in the new SYI 2.0 form as there is a box that can be checked to give you the icon.
- Click here to get some color codes for your text or background.
- To start a new line add <BR>.
- To add spaces (blank lines) below your lines or pictures add <BR><BR>. The more you add <BR>, the more space (blank lines) you will get.
- Pictures, backgrounds and sound files must be uploaded to your server to use, click here to learn how to do it.
- Be sure you only have http:// once at the beginning of your URL.

<font size=+2><a href="ERASE THIS AND PASTE YOUR SELLER PAGE URL HERE">VIEW MY OTHER AUCTION ITEMS</a></font>

VIEW MY OTHER AUCTION ITEMS

Back to table of contents

Add a picture

<center><img src="YOUR PICTURE URL"></center>

Back to table of contents

Two pictures side by side

<center><img src="YOUR PICTURE URL">
<img src="YOUR OTHER PICTURE URL"></center>

If your pictures are large, sometimes they will be forced to show one on top of the other. Keep in mind that other viewers may have different size monitors and use different monitor settings. If the pictures are
too wide to fit on a small screen, you can make them fit on all monitors without scrolling like this:

Note: Be sure each picture is at originally least 1/2 of the screen as this will distort smaller pictures. Also, it's not a good idea to use this code inside a table.

```html
<img src="http://YOUR PICTURE URL" width=48%>
<img src="http://YOUR OTHER PICTURE URL" width=48%>
```

If you still want them side by side and don't care if the screen scrolls copy the code below and paste it in the description box. Then add your picture URL. If you want to put space between them, put your cursor in the middle between `>` and `<` Now all you have to do is hit your space bar and move the URL's apart. DON'T HIT YOUR ENTER KEY, they must be touching and seperated using your space bar only. You don't need to put anything in between. The further you move them apart, the further apart your pictures will be. This also works for more than two pictures.

```html
<pre>
<img src="http://YOUR PICTURE URL"><img src="http://YOUR PICTURE URL">  
</pre>

Arrange Your Pictures Using Tables

---

Two pictures vertical

<center><img src="http://YOUR PICTURE URL"><br><br>
<img src="http://YOUR OTHER PICTURE URL"></center>

Back to table of contents

---

Three pictures vertical
Below are 4 options for clickable pop up e-mail boxes. The first one is a standard box, the second one has the subject line already filled in by you and the third one is handy if you want to know where the e-mail is sent from. The fourth one is a combination of the second and third. Instead of text, you can use a picture by erasing "E-MAIL ME" and inserting the picture URL like this: <img src=http://YOUR PICTURE URL>
IMPORTANT Be sure to include all the quotation marks and < and > where I placed them.
Full page backgrounds
Notice: you have to add the URL of the background in two places.

```html
<style> <!--Body {background: url(http://YOUR BACKGROUND URL)}--> </style>
<body background=http://YOUR BACKGROUND URL>

Back to table of contents

Full page Fixed backgrounds
This will allow the page contents to scroll while allowing the background to remain stationary
Notice: you have to add the URL of the background in two places.

   Note: Fixed backgrounds don't work on all browsers.

```html
<style> <!--Body {background: url(http://YOUR BACKGROUND URL); background-attachment: fixed;}--> </style>
<body background=http://YOUR BACKGROUND URL bgproperties=fixed>

Back to table of contents

Full Page Background Colors
NOTE:
The standard "bgcolor=" code will not work for full page backgrounds on eBay. You must make a small colored square in your paint program. Convert it to a .jpg or .gif file, and upload it to your server the same way you would upload a regular background.
Sounds you can turn on & off.
AUTOSTART=true will start the music when the page is loaded.
Loop=false will only play the sound once.
Sounds you can turn on & off.

Click here to turn on the sound.

<a href="http://YOUR SOUND URL">Click here</a> to turn on the sound.

Back to table of contents

Scrolling Text Box

You can set the width by adding to or subtracting from the cols= the higher the number the wider the box will be. You can also set the height with rows=

<td>&lt;li&gt;Two&lt;/li&gt;&lt;/ol&gt;</td>
<td></td>
</tr>
</tbody>
</table>

### Definition List

<table>
<thead>
<tr>
<th>What You Type</th>
<th>What You Get</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;dl&gt;Definition list</td>
<td>Definition list</td>
</tr>
<tr>
<td>&lt;dd&gt;Item one</td>
<td>Item one</td>
</tr>
</tbody>
</table>
You can add a picture in the location box the same way you put a picture in the Description box, using `<img src=http://Your_Picture_URL>`. The problem is, most URL's are too long to fit in the description box with the HTML needed to display the picture. Fortunately other HTML codes will work in the location box.

`<font color=red size=+5>Florida</font>` will give you **Florida**. Don't use quotation marks ("”) in the location box or the Add Picture box.
Want to put a small logo or picture at the top of your auction item next to the title? This code makes it possible for you to do that.

```
<div style="position: absolute; top: 102px; left: 18px">
  <img src=http://your_picture_URL.jpg></div>
```

The picture will show on the preview page but won't be in the correct location until the auction is submitted.

**Important!** This is meant to only put a small logo or very small picture next to your title. DON'T use a large picture as it will cover the title.

---

### Misc. HTML Codes

**These only work in Internet Explorer** Color & size of text can be changed to meet your needs.

- `<marquee>MARQUEE</marquee>`
- `<marquee direction=right>MARQUEE</marquee>`
- `<marquee behavior=alternate>MARQUEE</marquee>`
- `<center><marquee behavior=alternate width=50%> MARQUEE</marquee></center>`
- `<marquee direction=up height=50>MARQUEE</marquee>`
- `<marquee direction=down height=50>MARQUEE</marquee>`
- `<marquee direction=down height=50 behavior=alternate>MARQUEE</marquee>`

Replace your text with a picture URL

```
<marquee><img src=http://Your picture URL></marquee>
```

To center a picture you put in the "Add Picture" box, Add this to the bottom of the "Description" box

```
<CENTER>
<marquee direction=up height=50 behavior=alternate><img src=http://Your picture URL></marquee>
</CENTER>
```

This only works with Netscape

```
<BLINK>BLINK </BLINK>
```
